Public Safety
FACILITIES ASSESSMENT

Summer of 2018
This document includes information collected by the Association of Village Council Presidents (AVCP) Public Safety Facilities Assessment team.

Throughout the months of May and June of 2018, this team conducted site visits of 46 villages in the Yukon-Kuskokwim Delta, also known as the AVCP Region.

The conditions of public safety buildings varied greatly.

Eight communities did not have a public safety facility of any kind. They are listed on page 4.

All aggregated information is found on pages 7-9.

Beginning on page 11, this document outlines each community surveyed, organized by AVCP units, with photos of areas in need of repair.

Every page identifies the top three to five critically necessary repairs to each public safety building. (It is by no means an exhaustive list.)

Critically necessary repairs to public safety housing, were also recorded, when possible.
POINTS OF FOCUS

Facilities assessed in each community included:

1. Public Safety Building
2. Public Safety Housing

(available to public safety officers)

When accessible, the following facility features were inspected and photographed.

- Foundation
- Posts & Pads
- Water & Sewer Lines
- Entrance
- Steps
- Egress Windows
- Siding
- Roof
- Chimney
- Meter Bases
- Vents
- Electrical Service Entrances
- IT infrastructure

TRAVEL

As all communities within the AVCP region are not connected to the road system, site visits were restricted to air and water travel. Once staff reached the sites, they relied on contacts made prior to arrival.

On average, three communities were assessed for each day of travel.

THE TEAM

The traveling team was lead by the AVCP Director of the Village Public Safety Officer Program, Alvin Jimmie, and Administrative Assistant, Edna Woods. With very little exception, they were always accompanied by at least one staff member from each of the following departments.

- Facilities
- Administration
- Communications
- Information Technology (IT)

Note: Staff are not licensed to conduct building inspections. Therefore, regardless of any description found herein, AVCP in no way represents or warrants that any facility is in a safe and habitable condition, and/or is suited to house public safety activities.

Renovations, requested
1. Boiler work
2. Reinforce cell door
3. Sewer line inspection
4. Foundation

IT Infrastructure
Wireless Antenna is present in the police department.

Public Safety Housing
Existing, state unknown
UNIT 4  Akiachak, Akiak, Kwethluk, Tuluksak, Akiachak

TULUKSAK
500 population
10.08% crimes per capita
0 VPSOs
0 TPOs
4 VPOs

Public Safety Building
Needs improvements
1. Foundation
2. Back door blocked
3. Poor lighting
4. Window

Public Safety Housing
None

IT Infrastructure
The Tuluksak jail did not have any internet connection, I did not see any wireless antenna inside or outside. Wireless internet would be preferred. The wireless antenna can be installed inside by the front window or on the roof to be pointed towards the GCI tower.
UNIT 5  Napakiak, Napaskiak, Oscarville

NAPAKIAK
